2018-2020

PROFILE

Seasoned in full-stack development for over two years, my expertise spans .NET Core, React, Angular, TypeScript, basic Python, Linux, Git/GitHub, Docker, clean architecture, Bootstrap, MySQL, and PostgreSQL.

Proficiently navigating complex frameworks, I craft scalable solutions. I excel in collaborative environments, synthesizing technical acumen with business objectives to deliver impactful outcomes. Continuously embracing new technologies.

PROJECTS

Initial Code Base (<https://github.com/Hyperspan/Base-Auth>)

- Created a c# class libraries that provides with an initial codebase that provides with basic authentication and authorization.
- Suitable for situations where we want to get new project production ready with basic features ASAP.
- Nuget Packages also available under the name of **Hyperspan.Base**
